# **CUBIC DESIGNS INTRODUCES NEW HANDRAIL SYSTEM**

New Berlin, WI . . . Cubic Designs is currently introducing "Cubic Handrail" an easy to install handrail system for pedestrian walkways, loading docks, production areas, assembly lines and more. Cubic Handrail is ideal for elevated in-plant offices, work platforms, balconies, stairs, equipment crossovers, landing areas and mezzanines.

Cubic Handrail is professionally engineered to meet all building codes including uniform and point load requirements. Cubic Handrail features a patented intermediate railing connection that simplifies installation and allows for quick expansion of handrail sections. A square tubing design is stronger and easier to clean than conventional pipe fitting designs. The continuous top rail provides a visually attractive, finished appearance.

Cubic Handrail is designed to be used throughout a plant or facility to define work areas and protect employees. Double or triple level systems are offered, custom designs are also available. Cubic Designs also offers a floor mounted rail system with a 4" kickplate as one complete handrail package for mezzanines or other elevated platforms.

Cubic Safety Rail is protected with an attractive, durable, powder coat finish available in 14 colors. Custom colors and finishes also available upon request.

Cubic Designs, Inc manufactures a full line of industrial safety products designed to provide total plant protection. The company offers heavy-duty Safety Rail, Rack Guards, Track Guards, Handrail Systems, Safety Gates, Bollards, Rack Aisle Guards, Ladders & Cages and Code Approved Stairways.
