CUBIC RACK GUARDS PROTECT RACK SYSTEM UPRIGHTS

New Berlin, WI . . . Cubic Designs now offers "Cubic Rack Guards" heavy-duty guards that protect rack system uprights from damage. Cubic Rack Guards feature a triangulated "wrap-around" design with durable steel construction to deflect impact from moving vehicles.

Cubic Rack Guards protect rack uprights by absorbing the impact of a forklift, sweeper or other in-plant vehicle. In addition to all-steel construction, Rack Guards feature factory welded base plates that easily bolt directly to a facility floor. Rack Guards are offered in two sizes (12" & 24" heights) and are available for installation around rack uprights with standard footplates or uprights with seismic footplates.

Cubic Rack Guards are protected with an attractive, durable, powder coat finish available in 14 colors. Standard yellow is offered for immediate shipment (within 48 hours or less after approved order). Custom colors and finishes also available upon request.

Cubic Designs, Inc manufactures a full line of industrial safety products designed to provide total plant protection. The company offers heavy-duty Safety Rail, Rack Guards, Track Guards, Handrail Systems, Safety Gates, Bollards, Rack Aisle Guards, Ladders & Cages and Code-Approved Stairways. For more information, call Cubic Designs at 800-826-7061, or visit the company's web site at www.cubicspg.com.
